

REMARKS

Numerous corrections to the specification have been made, including changing the title to Method of Ablating Cardiac Tissue in the Pericardial Space.

The claim has been amended to make it clear that the intended method takes place between the interior surface of the pericardium in the exterior epicardial surface of the heart. The practice of ablation in this space is not known from the Lesh? reference.

CONCLUSION

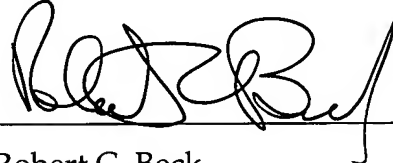

All of the claims remaining in this application should now be seen to be in condition for allowance. The prompt issuance of a notice to that effect is solicited.
